

Reception Maths Flip

On the first week back at school we will be learning about how to sequence familiar events we do in our everyday life.

Children will be learning the concept of now, next, then, after and will be encouraged to use these words to talk about what they do every day.

Have a go at the following game with your child:

Times of Day

Age 5 to 7 ★

Here are five pictures showing something happening at different times of the day.

Have a good look at each one. What do you see in the picture? What is happening? Could you describe it to someone else?

You could use these pictures in different ways. For example:

1. You could put them into an order in which you think they might happen through a day.
2. You could suggest what time these things happen in your day.
3. You could see how many hours might pass between pairs of pictures you have chosen.
4. You could draw another picture that might 'fit' between two of the pictures.
5. You will have your own ideas too...
