

Maths

This week in maths your child has been learning about the concept more or less.

Help your child draw three ladybugs in their homework book, now divide the ladybug into two halves by drawing a line down the middle. For example,

On one half ask your child to draw a number of dots, then on the second half ask them to draw more or less dots than the first half.

Now ask your child to label the ladybug. The side which has more put an M and the side which has less put an L.
