Only female bees have stingers. They use their stinger to protect themselves and their nest.

They like to eat nectar and pollen from flowers. Nectar is a sticky liquid. Pollen is a yellow powder.

## Types of Bees

There are lots of different types of bees! In the UK, the most common types of bees are honeybees and bumblebees.

### Honeybees

Most honeybees live in beehives.

They make honey so that they have something to eat in winter. This is because there are fewer flowers to feed from.

Honeybees perform a 'waggle dance'. This is a way of moving their bodies to tell other bees where they can find food.

### Bumblebees

Bumblebees live in nests. Some types of bumblebees build their nests underground.

Bumblebees have smelly feet! They use this smell to tell each other apart.
